

**PETROVIETNAM POWER NHON TRACH 2 JOINT STOCK COMPANY  
(NT2)**

Ref.No: 678 /TB – SK&QHCD

Nhon Trach, October 04<sup>th</sup>, 2017

**NOTICE**

**Successful completion of the first major overhaul of Nhon Trach 2 CCPP and full load commercial operation during the entire 4<sup>th</sup> quarter 2017**

To: NT2 Shareholders and investors

Following the previous notice 581/TB-SK&QHCD dated on August 25<sup>th</sup>, 2017, PetroVietNam Power Nhon Trach 2 JS Company (NT2) is very pleased to inform our esteemed shareholders and potential investors that all scope of the first major overhaul of our Nhon Trach 2 CCPP have been successfully completed on yesterday October 3<sup>rd</sup>, 2017. Considerable maintenance/repair/change of spare parts/upgrade work... have been carried out safely and met with international quality requirement and effective cost saving. The actual implementation was within 32 days only, i.e. 6 days ahead of the approved schedule. Our wonderful plant is now back to full load combined cycle commercial operation with a total generating capacity increased by about 24 MW comparing to before-overhaul outputs.

The next major overhaul of NT2 CCPP will be due by 2023, after next 6 years of commercial operation or 50,000 equivalent operating hours (EOH).

In order to prioritize gas-fired power generation in compliance with current MOI policy, our plant is expected to be continuously operated at full based load during the entire 4<sup>th</sup> quarter 2017 at least.

Respectfully yours ./.

**ON BEHALF OF GENERAL DIRECTOR**

**NGUYEN NGOC HAI**
